Thanks Tanya,

Yesterday evening, I gave a talk to the Santa Susana Mountain Park Association (SSMPA), entitled "Radiation Dose, Risk and Cleanup Standards."

It discussed the linear-no-threshold theory of radiation risk and the various cleanup standards at SSFL including 15 mrem/y, SB-990 and the 2010 AOC.

See <https://philrutherford.com/ssfl.html#rdrcs>

I gave the short version to SSMPA, but a longer, more detailed version is on the same link. It would be beneficial if your team peruse this material before our meeting next week. Plus, of course the [April 6 letter](#).

See you next Wednesday.

Phil
