Dear Utah Regulators and DOE Inspector General,

It has been 60 days since I submitted my concerns regarding DOE/ETEC's waste shipments to the Utah Division of Waste Management and Radiation Control, and the DOE Office of Inspector General.

Although I received prompt receipt acknowledgements from both your offices, you have yet to respond to the concerns. Please provide a status on your investigations.

It has been 90 days since the original complaint addressed to the DOE ETEC Program Office, DOE HQ, North Wind, EnergySolutions and CalEPA's DTSC, again with no response from any organization.

The complaint is regarding an egregious falsification of radioactive waste manifests (NRC Form 540/541) that deserves an open investigation. An investigation that appears to be not happening.

Since this issue will be presented at the upcoming Health Physics Society Annual Meeting in July 2023 (<https://burkclients.com/hps/2023AM/program/singlesession.php?sessid=TAM-C>), I would appreciate your prompt attention to this matter, so that I may correctly present DOE's and Utah's positions.

Sincerely,

Phil Rutherford Consulting
